

Crosscall Trekker M1 Screen protector Tempered glass

Crosscall

Descriptif produit

Thanks to this tempered glass protection, you will strengthen the glass of your already very resistant mobile. Your CROSSCALL mobile will then be doubly protected to deal with unforeseen events linked to your sports or professional activities.

This tempered glass has a hardness of 9H on the Mohs scale. It is therefore able to protect your phone screen much better than regular glass during a bad fall.

Perfectly suited to your Crosscall smartphone model, this tempered glass will protect your screen without altering its visual quality or its responsiveness in tactile navigation.
