

Universal UV sterilization machine with wireless charging

Samsung

Descriptif produit

Eliminates 99% of bacteria

A protection tool

Ideal for your everyday objects such as smartphones, keys, glasses or any other small object. Thanks to this UV sterilization box protect your interior from bacteria. Enjoy a spacious design designed for products as large as the Galaxy S20 Ultra.

Kills 99% of bacteria

The effectiveness of this UV sterilization box has been tested and proven by laboratories to eliminate up to 99% of bacteria in 10 minutes * including Escherichia coli, Staphylococcus and Candida albicans bacteria. Thanks to the intensity of its rays, UV light destroys the molecular chains of bacteria, thus preventing its reproduction and propagation. Equipped with two UV lamps, this device can disinfect the upper and lower surfaces of the products.

Equipped with wireless charging

Disinfect and recharge your device at the same time, it's possible! The UV sterilization case has been designed to charge your devices compatible with Qi wireless charging. The load continues to operate even if the UV sterilization process is completed.

A magnetic closure that you will appreciate

The magnetic cover ensures a tight seal and a feeling of stability when opening and closing the case. Its flexible free-angle hinge and silicone button provide the user with a soft and pleasant touch.
