

Bluetooth® Speaker Lilywood Luminous with Essential Oils Diffuser Synergy Zen Aromasound

Descriptif produit

Want Zenitude? Lilywood allows you to create this cocooning atmosphere thanks to the diffusion by cold misting of essential oils in music and in light.

This diffuser can be controlled using an application to refine your diffusion time, light intensity, the choice of colors or program the time of diffusion, Lilywood is also a humidifier. Like a water lily flower, Lilywood is an elegant mist sprayer for your interior.

Light control

With the application, choose your color and choose the light intensity. You can therefore turn the light emitted by the diffuser on or off completely. But what a soft and warm atmosphere you will get with this subdued light. Relaxation guaranteed!

Humidifier

Thanks to its large tank, Lilywood can be used as a room humidifier. Fill the tank with water, preferably non-lime, and turn on the diffuser. No need to add essential oils in this case.
