

2-Pack Smart LED bulbs Antalya 11W E27 Google Assistant, Alexa & Siri White + RGB Multicolor Konyks

Descriptif produit

Adjust the intensity and colour of your light with these adaptable bluetooth bulbs.

New EASY RANGE
Super fast installation with local Bluetooth control. Upon installation, the app detects the bulb and helps you to install it automatically in only about 10 seconds.

Powerful lighting
1050 lumens in White, 11 Watts power (equivalent to 90W incandescent)

Create your own atmosphere
RGB, White, Warm or Cold colours from 2700K to 6500K, the setting is done in the application or by voice. Perfect for a gentle wake-up call!

In Music
The lighting atmosphere can also be synchronised with the music played by the smartphone. Club atmosphere at home!

Voice control
With Alexa, Google Home or Siri shortcuts you can control the light bulb from your sofa with a simple voice command. For example "OK Google, turn the bedroom light to light blue".

Control via Smartphone
Whether you're at home, in the office or anywhere in the world, you're in control of your devices.

Automate easily
The Konyks application makes it very easy to create scenarios (sequence of commands) or multiple conditional automations, e.g. switching the light in the children's rooms to night light mode from 21:00.
