

# **Crosscall Action X5 Screen protector Tempered glass Crosscall**

# **Descriptif produit**

### Great protection

Made from top-quality Japanese tempered glass, the pane has been precision-cut and polished to ensure an optimum fit.

The protective glass is like a fuse, shattering to protect your phone in the event of a major impact.

### Sensitivity to touch preserved

After just a few minutes' use, you'll forget your glass is on, and its oleophobic treatment will reduce fingerprints and grease marks.

#### Easy to fit

Thanks to the thin layer of silicone that covers the inside of the glass, installation is quick and easy, with optimum hold.

## Ultra-clear

The special 92% transparent material retains all the luminosity and colours. Its soft, smooth surface keeps your phone in pleasant contact.

### Sapphire glass 9H resistance

Sapphire glass offers the best scratch resistance. No more scratches left by a bunch of keys or other objects in your pocket.
