

Bluetooth® Headphones Clam ANC Circum-auricular Storm Grey Fresh'n Rebel

Descriptif produit

Clam headphones offer a quiet, private listening experience with a fashionable twist.

Wireless

The Clam and Clam ANC are wireless headsets that work via Bluetooth. Connect them easily to your device and listen to your music wirelessly.

Circum-aural design

The Clam and Clam ANC are so named because their earpieces are shaped like cases. They have an isolating effect, keeping you separate from your surroundings.

Active Noise Cancellation

Activate Active Noise Cancellation on your Clam ANC to mute the world. No more distractions; just press the button and immerse yourself in your music. Advanced Active Noise Cancelling technology reduces ambient noise by up to 26 dB. Inside each earpiece is a microphone that detects the frequencies of surrounding sounds and creates opposing sound waves. This is especially useful for reducing low-pitched sounds, such as the sound of air conditioning on a plane or train. With ANC, you can truly enjoy your music in silence and with greater clarity.

Battery life

Enjoy up to 35 hours of wireless music on both models. Using the ANC feature on the Clam ANC? Then you can enjoy up to 30 hours of music without charging.

Maximum comfort

The innovative shape of the headband and the low pressure of the headband ensure a comfortable fit throughout the day. In addition, the ear cushions are moisture-wicking and made of soft vegan leather.

Qualcomm aptx

Give the tunes you love the sound quality they deserve with Qualcomm® aptX™ (only on Clam ANC). Qualcomm® aptX audio enhances sound quality wirelessly, so music lovers can make the most of every song.

Foldable and swivel

Both the Clam and Clam ANC headphones are foldable and swivel. So when you're not using them, you can store the headphones safely in the included carrying pouch or wear them comfortably around your neck.
