

Smart Camera Rex 3D 3MP 2K Panoramic and Reclining Indoor Black IMOU

Descriptif produit

The camera provides essential protection when you are away from home.

Powered by precision AI IMOU SENSE™
IMOU SENSE™ is a self-developed AI algorithm under the IMOU brand, including video, audio, navigation and perception algorithms, using industry-leading technology allows your IMOU device to be up to 50% more accurate than ordinary products.

360° protection with pan and tilt
Rex 3D supports a 0° to 355° viewing angle and a 0° to 90° tilt for total protection of your home with a 360° view.

Highly dynamic image quality up to 3K
Rex 3D offers video quality up to 3K, so you won't miss a single detail. The 8x digital zoom also lets you see further.

Intelligent protection
Extremely fast messaging and customisable security controls to suit your needs.

Fast 0.6-second messaging: virtually instant access to critical video footage in the event of an emergency or threat, enabling immediate action to be taken to prevent or mitigate potential damage, improving the system's effectiveness and reliability in monitoring and protecting property.

Your home is protected from all sides thanks to auto-cruise: the auto-cruise function enables your security camera to rotate continuously and scan all sides of your property. Thanks to this function, you can keep a constant eye on your property without any blind spots. This feature is particularly useful when you're away from home, as it allows you to ensure that your home is safe and secure day and night.

Customisable alarm sound: customise the deterrent sound to scare off intruders and stop them trying to get into your property. If you have pets, you can record a message asking the intruder not to harm them. You can also create a sound that imitates the barking of a large dog, which can deter even the most determined intruder. This is an excellent tool for improving the effectiveness of your security camera system. By creating a personalised message or sound, you can take control of your security and protect your home or business more effectively.

Schedule your security as you wish: by programming when your security camera should be switched on, you can ensure that your system works efficiently, without having to manually switch it on and off every day. What's more, regular use of the security camera can help maintain a routine, reducing the risk of unpredictable events or intrusions. Finally, setting a schedule for your security camera can help reduce energy costs, by allowing the device to operate only at the most critical times of the day or night. Ultimately, scheduling your security camera can give you peace of mind and increased security without requiring a significant investment of time or money.

Define detection zones to avoid false alarms: with customisable zones, you can enhance the functionality of your indoor security camera by focusing on specific areas

Compatible WiFi

Color : Black

Feature(s) : Indoor - 3MP

Pack contents : Smart Camera Rex 3D 3MP 2K Panoramic and Reclining Indoor + User Guide/Security/Warranty

of interest, such as doors, windows or high-traffic areas. The ability to define custom zones allows the camera to alert you only when motion is detected in the specified area, reducing false alarms and avoiding unnecessary notifications. Custom zones also ensure privacy in areas where no surveillance is required. So, with customisable zones, indoor security cameras are a versatile solution for securing and monitoring your property while enhancing comfort and privacy.

Your home is accessible from anywhere: a built-in speaker and microphone with echo cancellation let you interact with your pets and family wherever you are. Thanks to two-way communication, you can now communicate with anyone inside your home, including children or pets when you're away. This feature allows you to hear what's happening in real time and react accordingly.

Privacy is a priority: with a simple click in the application, Rex 3D will automatically close the camera lens cover to stop recording and protect your privacy at home.

Child's play to install

Installing the security camera takes just a few minutes. It can be placed almost anywhere. In fact, it's so simple that there's no need to call in an expensive contractor.
