Elegant and innovative jewelry smartwatch

Timeless Beauty × New Technologies

Discover the new generation of the iconic smartwatch that combines a classic look with advanced technology. The Maxcom FW44 Gold 2 is a jewelry-like gadget that will enhance your style and improve your daily comfort.

Stylish Jewelry

The Maxcom FW44 Gold 2 is a new version of the bestselling FW42 Gold smartwatch, loved by women. With a design that references traditional watches, a steel case, and a subtly shimmering bracelet, this smartwatch adds a touch of elegance to any outfit.

Like a Traditional Watch

Equipped with a 1.2-inch AMOLED touch screen, the Gold 2 offers rich colors and excellent readability. The AOD (Always On Display) mode allows the time to be displayed on a dimmed screen, making it perfect for use as a traditional watch.

Attention to Detail

The Gold 2 features unique, custom watch faces that exude elegance and a distinctive style. Additionally, the watch offers access to over 100 free watch faces available through a dedicated app, ranging from colorful to monochromatic, digital, and analog. Every woman can find something to suit her taste.

Always in Touch

The watch keeps you updated with incoming SMS messages and social media alerts, such as from WhatsApp. You can also make and receive calls directly from the Gold 2 smartwatch. This feature allows you to stay connected with loved ones or colleagues without reaching for your phone.

Wellbeing Guru

Gold 2 helps you take care of your wellbeing. The watch motivates you to stay active daily, analyzes sleep quality, suggests breathing exercises, measures stress and mood, and reminds you to stay hydrated. These functions ensure that your mental and physical comfort is a priority.

Designed for Women

Gold 2 combines a classic look with advanced technology. It can continuously measure heart rate and blood pressure, with results recorded in a dedicated app. Built-in menstrual and pregnancy calendars make everyday life easier for women.

***Note:** The smartwatch is not a medical device, and its readings should not be considered as medical measurements.

For Active Lifestyles

Though it looks like jewelry, the Gold 2 is also a versatile fitness trainer. It counts calories burned, steps, distance covered, and monitors parameters for over 70 sports disciplines. This helps track your progress and supports you in achieving fitness goals.

Efficient and Practical

With an efficient battery, you can forget about charging for up to 7 days (this does not apply to the active AOD feature). The Gold 2 also allows remote control of your phone's camera and provides weather forecasts, making daily life even more enjoyable.
