

EarPods Lightning Earphones White Apple

Descriptif produit

Earphones that follow the geometry of the ear

EarPods with Lightning connectors are adapted to the shape of the ear, which makes them more comfortable for more people than other in-ear headphones.

For high-quality sound, EarPods' drivers are designed to minimise sound loss and maximise sound output.

The cable also includes a remote control for adjusting volume, controlling music and video playback, and answering and ending calls.

Important note: compatible with all devices with a Lightning connector that support iOS 10 or later, including iPod touch, iPad and iPhone.

Lightning
