

Bluetooth® Musical Night Light 9W Lula Moon Bigben Audio

Descriptif produit

Light up your rooms with a musical touch

Adjustable light intensity

You can adjust the light intensity to suit your child's needs, with three intensity levels: 10%, 30% or 100%. This allows you to personalize the lighting for your child's optimum comfort.

Light programmer

The nightlight is equipped with a practical timer, allowing you to select a light ON time: 15, 30, 60 minutes or OFF. This means you can program the light to go out without disturbing your child's sleep.

Airplane mode (Bluetooth cut-off)

For added peace of mind, airplane mode cuts off the Bluetooth connection, preventing interference and ensuring a quieter sleep environment.

9-watt music speaker

Thanks to its 9-Watt speaker, the nightlight offers clear, pleasant sound quality, ideal for playing lullabies or relaxing music throughout the night.

Bluetooth® connection

The Bluetooth® function lets you easily connect your device to play your favorite music or soothing sounds directly from your phone or tablet.

220V power supply included

The device is powered directly from the mains with an included 220V cable, guaranteeing continuous use without having to worry about batteries.
