

Wireless Charger DUO 15W Qi Gray Xtorm

Descriptif produit

This Xtorm Duo wireless charger is the ideal accessory for easily charging your smartphone at charging speeds of up to 15W.

The ease of wireless charging

Charging cables often look messy and always seem to disappear behind furniture just when you need them. This wireless charger makes charging your smartphone super easy – just place your smartphone on it to start charging automatically.

Magnetic duo

Thanks to the innovative integrated magnetic click system, you can choose to use the chargers as a dual wireless charger or as two single chargers. For the dual charger, you only need one charging cable! Prefer to use the chargers separately? No problem, two cables are included so you can decide how to use them.

Fast wireless charging

This wireless charger has been designed to quickly and safely charge your smartphone at a charging speed of up to 15 W. This makes it perfect not only for charging your device at night, but also for quick charging during the day.

No annoying LED lights

Unlike traditional chargers, which often have annoying lights that cannot be turned off, this wireless charger has been designed without any LEDs, which is particularly convenient if you want to place it on your bedside table. Instead, it features a distinctive light ring around the base, which only lights up briefly to indicate that charging has started. After a few seconds, it slowly fades out and remains off, so you don't have a bright, annoying light on your bedside table or desk.

Compatible with all smartphones

The wireless charger has been designed for use with all Qi-compatible smartphones - Android and Apple iPhones.

Developed with passion

At Xtorm, we believe that using our products should bring you pleasure and energy. That's why we pay special attention and care to the design and user-friendliness of our products.

Giving you #MoreEnergy

This wireless charger features an iconic geometric design with a matte, soft-touch finish; it is designed to look and feel exceptional. The result: this charger stands out from the crowd and is a real pleasure to use every day – giving you and your devices more energy.
