

Champagne Bucket Lamp + Bluetooth® Speaker Atmos 15W Luminous Kooduu

Descriptif produit

Designed by Jacob Jensen Design, this connected and luminous Bluetooth speaker transforms into a bottle cooler. Ideal for the living room, it's portable and suitable for use on the patio. Made in Europe

Atmos: a luminous Bluetooth speaker with sleek lines
Delicately placed on a brushed silver steel base, Atmos focuses on pure forms for aesthetics; but behind this apparent simplicity lies a versatile and high-tech product: it combines a Bluetooth speaker to stream your music playlists from any Bluetooth device (computer, tablet, smartphone), an LED lamp to create a warm glow, and a cavity on top that can be used as a champagne cooler to keep up to two bottles chilled.

With its simple aesthetic that enhances its appeal, the portable Atmos speaker will blend perfectly into your home. Lightweight and robust, it can easily be moved to the patio or garden for cozy evenings with friends.

You can also use it as a plant stand with its upper cavity: a luminous pot, for a subdued ambiance, can also be used as a connected speaker to play background music or your favorite radio station via Bluetooth from a mobile phone or tablet, for example.

A very trendy, elegant, and innovative product that is sure to attract the attention of your guests.

The highlights of this speaker:

This speaker benefits from the latest technologies and features developed by Kooduu. The 15-watt wideband speaker delivers crystal-clear sound and offers true wireless stereo sound (TWS).

The speaker is equipped with Bluetooth 5.0 for a truly seamless connection.

Thanks to its USB-C charging port and included charging cable, this speaker charges very quickly in 3.5 hours and has a battery life of up to 10 hours.

The 2W LED light provides a beautiful, warm 2700 kelvin brightness. The intensity can be adjusted to four levels. The lamp and speaker functions are separate: you can listen to your music without turning on the speaker's light, and conversely, you can use only the lamp function, or both at the same time.

The controls and USB port are easily accessible while remaining discreet on the base of the lamp.

Finally, this speaker is made in Europe.
